

PRONTO-Xi

Screen Customiser

PRONTO-Xi Screen Customizer lets you make sophisticated customizations to the PRONTO-Xi user interface quickly and easily without writing any application code.

Screen Customizer's intuitive graphical interface makes it easy to:

- ◆ Develop finely tailored interfaces to suit your specific business needs and processes;
- ◆ Gain direct access to PRONTO-Xi's user definable fields from existing screens;
- ◆ Add additional business logic to the system using validations, restrictions and triggers for supplementary programs.

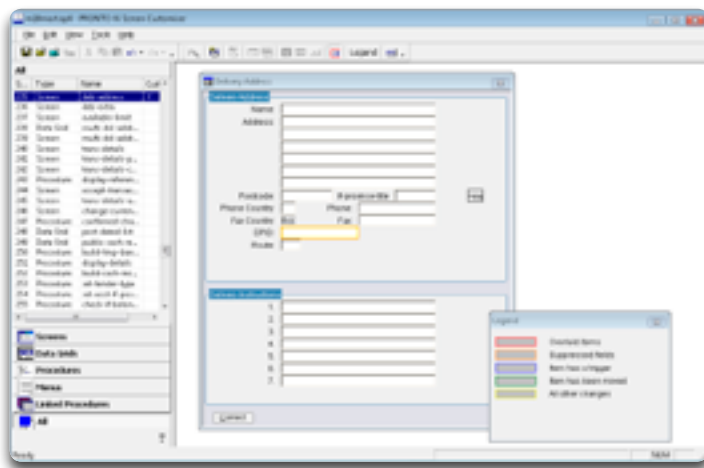

Customize Screen Design

Screen Customizer gives you an enormous degree of control over the look and feel of your PRONTO-Xi screens – change button names, reposition fields on the screen, suppress fields from being displayed, change the field prompts, and even change the color or size of the fields displayed. To aid navigation for key data operators, the default tab order can now be set for form entry type screens.

Screen Customizer also lets you write your own tooltips for each field and override the default messages that PRONTO-Xi presents to users to ensure the system reflects the terminology used in your business.

Validate inputs

Screen Customiser allows you to further enhance PRONTO-Xi's already substantial business logic and input rules. You can specify default values for fields, declare a subset of valid inputs, and even set fields as read only. Screen Customizer also allows you to validate the use of the buttons at the bottom of most PRONTO-Xi screens based on the criteria you set. This gives administrators comprehensive control over what users can do at an individual screen level, reducing errors and enforcing corporate policy.

Key Benefits

- ◆ Finely tailor your system to your company's exact needs
- ◆ Improve the productivity of your staff and reduce operator error
- ◆ Supplement PRONTO-Xi's business logic for your own specific requirements
- ◆ Incorporate custom programs into the PRONTO-Xi workflow
- ◆ Access information from external sources and incorporate it into the PRONTO-Xi interface
- ◆ Enable direct input access to PRONTO-Xi's User-Definable fields

Technology

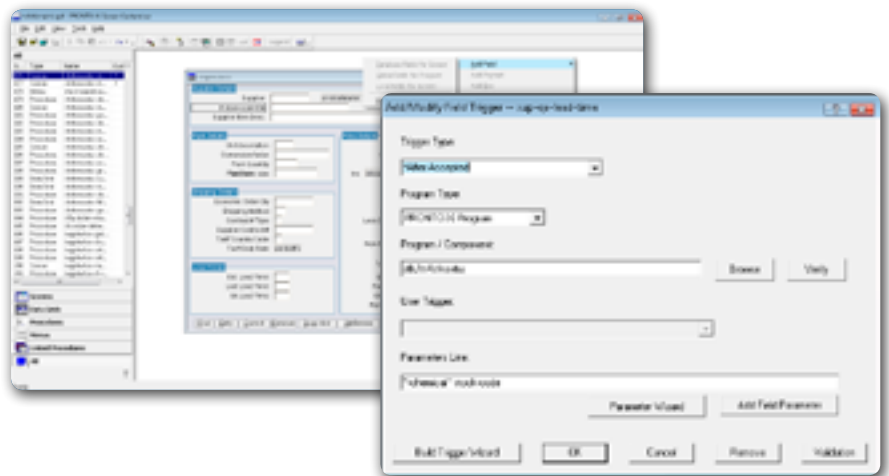

- ◆ Launched directly from PRONTO-Xi Client
- ◆ Full WYSIWYG screen design with unlimited undo capability
- ◆ Fast searchable access to screens, data grids, menus and procedures within PRONTO-Xi programs
- ◆ Powerful Global Prompt Replacement utility, allowing mass changes to prompts without having to edit one screen at a time
- ◆ Snap to grid capability to assist with object positioning
- ◆ Support for triggers and default values on check-boxes and radio buttons
- ◆ Set default tab order (keyboard navigation) for form entry type screens

Trigger Additional Programs

For those looking for highly advanced levels of customisation, Screen Customizer allows you to automatically trigger the launch of additional programs based on entries in fields, check-boxes or radio buttons. Examples of useful triggered programs include sending automatic e mails, validating input against an external lookup table or launching third party, industry specific applications.

Access Additional information

Screen Customizer enables you to access information that is typically not available on the screen that you are customising. Through the use of triggers, a screen can display values collected as the result of a calculation or values that are stored in PRONTO-Xi tables not normally associated with that input screen. Also, a number of user definable fields are available in many PRONTO-Xi screens. With Screen Customizer all you will need to do is unsuppress them to make them available for viewing and for editing.

...so easy to work with™

For those who input data into the system, tailor made Screen Customizer enhancements can make PRONTO-Xi even easier to work with. For administrators, Screen Customizer makes sophisticated customizations a breeze.

About PSA Inc.

As a leader in the enterprise software services industry, PSA Inc., is known for its dedication, professionalism and its comprehensive business knowledge. PSA specializes in providing value added business solutions that are aligned with its clients' goals and expectations. Experienced resources are at the foundation of the PSA organization. With over 300 years of combined experience, our resources have worked in every phase of the enterprise software cycle while also providing 'Best Practices' expertise that remains unmatched in the industry.

PSA is proud to have assisted hundreds of businesses across Canada and the United States in reducing operating costs, improving operating efficiencies and gaining competitive advantages in their marketplaces.
