## Distribution

Having the right product at the right time and effectively managing your order processes from procurement to dispatch are critical success factors of any distribution business.

PRONTO-Xi Distribution provides all the functionality you need to manage your distribution business. Comprising Inventory, Purchase Order and Sales Order Management, PRONTO-Xi Distribution delivers superior co-ordination and integration of product, information and finance flows.

### **Deliver in full, on time, every time**

Increase business agility with rapid sales order entry and outstanding warehouse throughput. Automated processes including stock re-ordering, warehouse replenishment and product configuration significantly reduce administrative overhead. Implement best practice inventory control and resource management through synchronized transactions across the extended enterprise including shipping agents and carriers.

### **Margin Control**

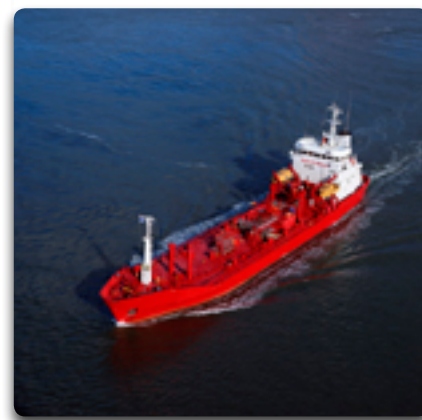

PRONTO-Xi Distribution captures comprehensive landed product costs including insurance, customs, freight and storage, bank charges and agents' fees, across multiple currencies.

This view of landed costs enables accurate gross margin analysis and true product profitability. In addition, you can dynamically price product lines to trade-off overall profitability against customer retention. Timely system alerts provide early warnings of diminishing product profitability via minimum margin levels. PRONTO-Xi's exceptional cost control enables you to source locally and globally, confident that you receive goods at the lowest price, within the required time-frame.
