

PRONTO-Xi

Scanpack

The frantic pace of typical warehouse operations is a frequent source of user error and inadvertent customer service issues. PRONTO-Xi Scanpack is a cost-effective way to eliminate order inaccuracies and increase customer satisfaction.

Scanpack significantly improves your picking, packing and dispatch processes by eliminating errors such as incorrect items being picked; incorrect numbers of items being packed; and stock being dispatched before completion. Also, Scanpack increases efficiency within your warehouses by optimizing the pick process and allowing you to generate accurate electronic invoices or Advanced Shipment Notifications (ASNs).

Improve Track and Trace Capability

PRONTO-Xi Scanpack creates an efficient, paperless process that automatically captures carton and pallet content information. With Scanpack you can scan items, cartons and pallets using standard barcode technology. Scanpack is fully compliant with industry standards to ensure you meet your trading partner despatch processing requirements. Major retailers often require goods to be scanned at time of despatch to ensure order integrity of the products being delivered to them. This process reduces logistics costs by ensuring accuracy of your outbound orders and the customers minimize their administrative costs by eliminating the need to return incorrectly supplied goods.

You can capture carrier and consignment details effortlessly, allowing you to easily track your goods and keep your customers informed. By fully supporting Radio Frequency (RF) barcode scanners, Scanpack allows your warehouse staff to “quality check” outbound orders by scanning the goods as they are being packed in readiness for dispatch. This results in a higher level of order accuracy and improved customer satisfaction.

“PRONTO-Xi Scanpack has enabled Creative Brands to achieve increased order accuracy through the seamless integration of information from the order fulfilment process through to despatch. Ensuring data integrity of products being shipped out to customers means we can be confident of providing a high rate of order accuracy to our customers who benefit from receiving the right products the first time”.

Maurice Grasso, Chief Financial Office, Creative Brands

Key Benefits

- ◆ Improved picking accuracy
- ◆ Improved productivity
- ◆ Adhere to trading partner compliance
- ◆ Increase accuracy of stock movements
- ◆ Enhance track and trace visibility

Technology

- ◆ Fully integrated module of PRONTO-Xi Enterprise Management System
- ◆ Requisite modules for Scanpack are:
 - ◆ Financials
 - ◆ Inventory
 - ◆ Sales Orders
 - ◆ EasyEDI

Increase Productivity

Since Scanpack RF creates automated processes, it typically increases per-staff throughput, making your warehouse more efficient, so you can handle higher stock volumes with the same staff, saving on payroll costs. In addition, the PRONTO-Xi Scanpack module will automatically print packing and Serial Shipping Container Code (SSCC) labels confirming dispatch accuracy, ensuring customer compliance and reducing the cost of inwards goods receipt at the customer end.

Increase Process Efficiency

Scanpack validates the required order quantities directly from electronic orders received via PRONTO-Xi EasyEDI. The tight integration of incoming order information allows Scanpack to automatically generate price, carton and pallet labels, as well as create dispatch documentation for your carriers. As your dispatch process is automated, you improve the accuracy of outgoing orders, reduce the possibility of invoice claims and ultimately speeding up the settlement cycle and cash flow to your business. You can easily create customer specific product labelling and dispatch documentation, rationalizing your dispatch process, eliminating costly manual processes, reducing double handling and minimizing your labor costs.

...so easy to work with™

PRONTO-Xi Scanpack enables efficient, paperless warehouse processes. The complete integration between PRONTO-Xi's Warehouse Management System and Scanpack ensures that this technology is seamlessly integrated into sales order and warehouse functions. Scanpack's sustainable efficiency and proven cost reduction drives a rapid return on your investment.

Scanpack gives you complete visibility of information both through your enterprise and out to your trading partners. This improves your supply chain efficiency and keeps your customers informed.

About PSA Inc.

As a leader in the enterprise software services industry, PSA Inc., is known for its dedication, professionalism and its comprehensive business knowledge. PSA specializes in providing value added business solutions that are aligned with its clients' goals and expectations. Experienced resources are at the foundation of the PSA organization. With over 300 years of combined experience, our resources have worked in every phase of the enterprise software cycle while also providing 'Best Practices' expertise that remains unmatched in the industry.

PSA is proud to have assisted hundreds of businesses across Canada and the United States in reducing operating costs, improving operating efficiencies and gaining competitive advantages in their marketplaces.
