

# PRONTO-Xi

## Easy POS

PRONTO-Xi Easy POS revolutionizes the Point of Sale experience with its unique scalability and total user control. Retailers can now brand their POS screens with their own look and feel. Training time is dramatically reduced by creating the workflow that leads staff intuitively through each transaction. Eliminate unnecessary data entry by removing functions you don't use and highlighting those you do. Easy POS is standard with PRONTO-Xi Phase IV Retail and requires no additional software.

### Ultimate Flexibility

PRONTO-Xi Easy POS gives you flexibility like never before. Many POS systems allow you to have your company logo on screen or change a color here and there, but Easy POS allows TOTAL flexibility of design, from the placement of buttons to the fields shown on screen to the functions available to the user. Want to call up a PDF version of your latest catalogue by pressing your logo with your finger? No problem. Your POS screen can even "wait" in the background until the catalogue is closed.

### Cover Every Customer

Many retailers wish to offer different services in different parts of the store. For example, a cash only express lane can be set up with streamlined functionality at the front of the store, while a service counter screen runs inside the store handling special orders, trade accounts and lay bys. With Easy POS each screen can be totally unique; one for each register if required, all running from the same system with total visibility of transactions across all tills. PRONTO-Xi Easy POS works for your unique situation, maximizing customer service.

### Unique Scalability

Tired of software that insists on running low screen resolutions? PRONTO-Xi Easy POS screens are fully scalable so they can run on existing hardware as well as taking advantage of larger screens with higher resolutions. Scaling is also real time, so upgrading your hardware doesn't require a software upgrade.

### Real time Changes

PRONTO-Xi's real time architecture enables changes to be made to your POS screens at any time. Need to add a "specials" button? System administrators can add to and remove buttons from screens as stores are trading. Simply exiting and re-entering the POS screen will apply the changes and no programming is required.

## Key Benefits

- ◆ Scalable to any screen resolution
- ◆ Use touch screen, keyboard or mouse
- ◆ Reduced training time
- ◆ Eliminate POS errors
- ◆ Build your brand

Flexibility

Form

Function

# Technology

- ◆ Interface layer driven by core PRONTO-Xi technology
- ◆ Make changes and apply them in real time
- ◆ Easily integrate third party applications into standard POS transactions
- ◆ Integrated price checker application

## Price Checker

Look like the Big Guns with the in-built Easy POS Price Checker. The Price Checker lets you utilize any spare PC to provide this useful customer service. Simply place a barcode scanner and screen within view of your customers and they can scan items to check product details. The Price Checker is password secured and utilizes the same customisable Easy POS screen technology, allowing complete flexibility of design. Use it to display a store map, or the latest specials. Your customers will love the service!

## ...so easy to work with™

PRONTO-Xi Easy POS represents the next generation of POS interfaces. A key success factor in retail is the ability to set yourself apart from the crowd. Customers appreciate your investment in technology if it speeds service times, looks the part and improves the customer experience. Coupled with PRONTO-Xi Retail's solid back end inventory, financial and sales management functions you have a winning combination. PRONTO-Xi Easy POS delivers the goods.

Full Position Menu Tree

- [-] Sale Type-> 000
- [-] Lookup-> 0300
- [-] Reason-> 300
- [-] Outline-> 400
- [-] Out-> 0
- [-] Sale Match-> 300
- [-] Qty--

- [-] Discount -D
- [-] Discount All -DO
- [-] Void Line -Y
- [-] Lookup-> 0300
- [-] Pay -> 1000
- [-] Extra -> 1000
- [-] At Sale End-> 1

Intelligent Workflow – Staff are guided through the sales process by cascading, context sensitive menus which you can control hundreds of levels deep with full historical tracking. Menu structures can even be copied from one screen to another for ease of maintenance.

The Hard Work is Done...

PRONTO-Xi Easy POS comes pre loaded with screen layouts and menu structures ready to go. If you wish to make changes (eg applying a new background) an image library of backgrounds and buttons is provided so no graphic work is required to create real impact in your stores. Alternatively you can add your own graphics, logos and buttons to suit your branding using standard graphic formats.

## About PSA Inc.

As a leader in the enterprise software services industry, PSA Inc., is known for its dedication, professionalism and its comprehensive business knowledge.
