## Maintenance Management

PRONTO-Xi  
ENTERPRISE MANAGEMENT SYSTEM

Maintenance Management

Need to maximize the performance of fixed, physical or capital assets?

Employing PRONTO-Xi Maintenance Management™ improves your asset utilization and resource productivity, as well as reducing disruptive breakdowns and maintenance costs.

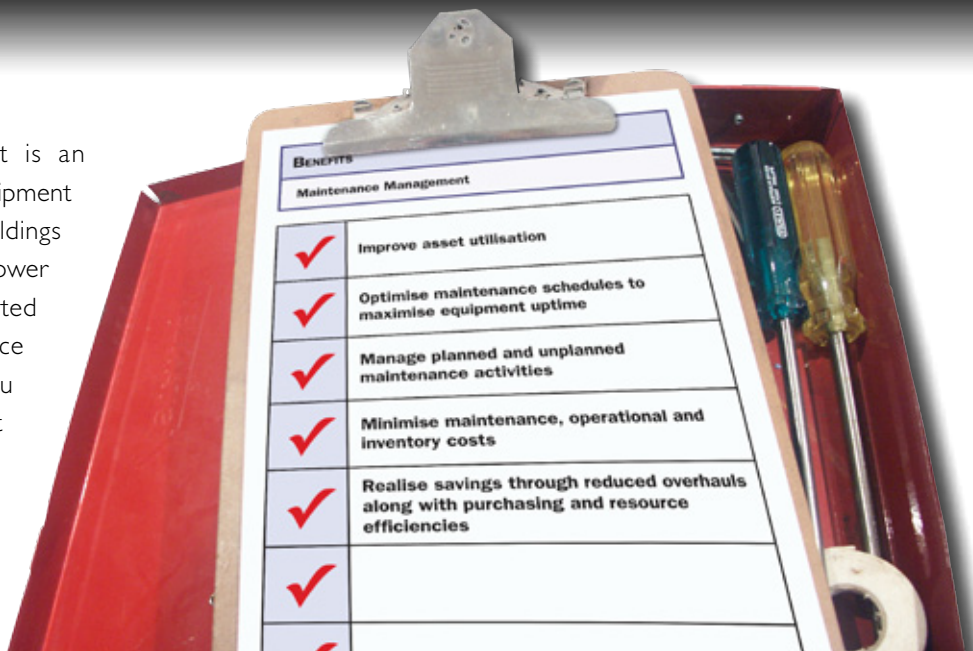

*“Improved efficiencies and procedures in our busy maintenance workshop, better planning and stronger inventory control – these all add up to real cost savings. Now we’re in control.”*

Paul Foster, Group Planning and System Development Manager, Greyhound Australia Pty Ltd

# Greyhound Australia

PRONTO-Xi Maintenance Management is an effective tool to assist you in improving equipment performance and minimizing inventory holdings while ensuring that the right parts and manpower are available when required. With integrated preventative and predictive maintenance functionality and rigorous project costing, you can anticipate plant downtime and equipment

*...so easy to work with™*

#### BENEFITS

#### Maintenance Management

- |   |   |
|---|---|
| ✓ | Improve asset utilisation   |
| ✓ | Optimise maintenance schedules to maximise equipment uptime                               |
| ✓ | Manage planned and unplanned maintenance activities                                       |
| ✓ | Minimise maintenance, operational and inventory costs                                     |
| ✓ | Realise savings through reduced overhauls along with purchasing and resource efficiencies |

## Work Order Management

PRONTO-Xi Maintenance Management comprehensively manages your work order process, accurately estimating cost, tracking status and ranking according to priority.

PRONTO-Xi Maintenance Management is fully integrated with PRONTO-Xi Inventory, Purchase Orders, Project Costing Management, Manufacturing, Fixed Assets and General Ledger. This integration provides sophisticated functionality such as automatic spare parts replenishment, comprehensive stocktake management, and inventory allocation against current and future jobs.

Full cost history reporting supports informed “replace or maintain” decisions. Information relating to process performance measures like Planned vs Unplanned Work, Preventative Maintenance (PM) schedule compliance and Work Order efficiency, can be readily obtained using standard reports. Fault Codes can be utilized to track the root cause of failures and special events in the equipment life cycle.

PRONTO-Xi Maintenance Management enables you to prioritize, plan and execute proactively.

## Preventative / Predictive Maintenance

PRONTO-Xi Maintenance Management allows your maintenance schedules to be created based on attributes such as: run time, condition, statutory inspection requirements and scheduled shutdowns. Resources required to complete a task such as labor types and times, tools, parts and special purchases can be assigned in order to assist in forecast planning.

Condition monitoring points can be configured to provide alerts based on known engineering limits, including the automatic generation of work orders to aid detection and analysis before a failure occurs.

## Equipment Register

Details relating to equipment identification – location, manufacturer, supplier, warranty date, installation date and costs – can all be accessed from PRONTO-Xi’s central Equipment Register. Budgets and actual costs incurred can be reported, queried or graphed by item per period per year for labor, materials and usage.

Equipment performance measures such as Mean Time Between Failures (MTBF) are automatically recorded against each equipment record.

With PRONTO-Xi Maintenance Management as your central Equipment Register you can make fully informed decisions about the life-cycle of each asset.

As a leader in the enterprise software services industry, PSA Inc., is known for its dedication, professionalism and its comprehensive business knowledge. PSA specializes in providing value added business solutions that are aligned with its clients' goals and expectations.

Experienced resources are at the foundation of the PSA organization. With over 300 years of combined experience, our resources have worked in every phase of the enterprise software cycle while also providing 'Best Practices' expertise that remains unmatched in the industry.

PSA is proud to have assisted hundreds of businesses across Canada and the United States in reducing operating costs, improving operating efficiencies and gaining competitive advantages in their marketplaces.
