PRONTO-Xi
ENTERPRISE MANAGEMENT SYSTEM

Manufacturing

Caught between accelerating customer demands, ever increasing product variety and complex materials management? Frequent disconnects between production, inventory, finance and customer service?

PRONTO-Xi Manufacturing™ supports a wide range of industries while still maintaining ease of use, rapid implementation and up-to-date information to all manufacturing stakeholders.

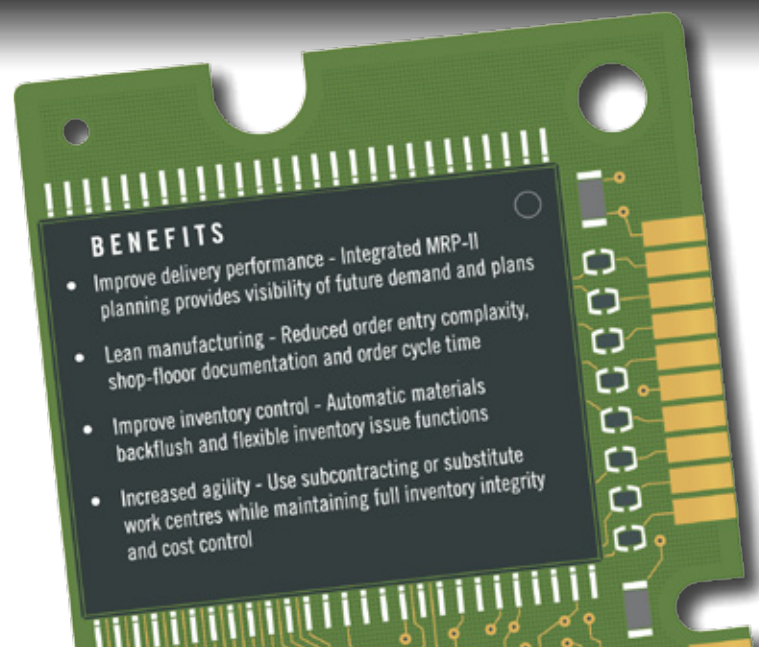

“PRONTO-Xi is very flexible in being able to replicate what the business is doing, especially in manufacturing”

Kellie King, Business Systems Manager, Tyco Safety Products

Tyco Safety Products

PRONTO-Xi Manufacturing seamlessly integrates your entire supply chain from sales to operations, distribution and finance, providing an accurate view of the critical elements in your manufacturing operation. Materials availability, production results and financial performance are just keystrokes away and are updated as manufacturing transactions are processed.

...so easy to work with™

Dynamic Product Configuration

The Product Configurator streamlines Make To Order (MTO), Assemble To Order (ATO) and Engineer To Order (ETO) environments. It dynamically creates inventory items in response to exact customer requirements and turns them into specific shop-floor instructions. It also calculates both cost and price for each individual sales order, which minimizes paper work, reduces lead times and dramatically cuts order administration overheads.

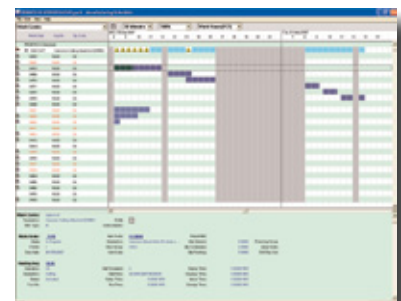

Superior Subcontracting Management

Subcontracting and outsourcing delivers flexibility and cost benefits. The superior subcontracting logic of PRONTO-Xi is flexible enough to handle ad-hoc changes in manufacturing load, yet rigorous enough to fully track both unplanned and scheduled work. With no need to create dummy inventory codes, inventory adjustments or manual processes, inventory integrity and inventory control can be easily maintained.

Powerful Planning

PRONTO-Xi Manufacturing Scheduler is a Windows-based drag and drop application which simplifies planning for work centers where many jobs are processed simultaneously. It reduces training needs and significantly decreases the time needed to schedule activities because the graphic display provides all the information needed for instant decision making. Your team is able to optimize operations, adapt to changing priorities and maintain exceptional customer service.

As a leader in the enterprise software services industry, PSA Inc., is known for its dedication, professionalism and its comprehensive business knowledge. PSA specializes in providing value added business solutions that are aligned with its clients' goals and expectations.

Experienced resources are at the foundation of the PSA organization. With over 300 years of combined experience, our resources have worked in every phase of the enterprise software cycle while also providing 'Best Practices' expertise that remains unmatched in the industry.

PSA is proud to have assisted hundreds of businesses across Canada and the United States in reducing operating costs, improving operating efficiencies and gaining competitive advantages in their marketplaces.
