ENTERPRISE MANAGEMENT SYSTEM

Retail

Lack of integration between storefront and back office impacting on your business? Inefficient systems costing you time, money and customers? Losing competitive advantage through stock and inventory delays?

PRONTO-Xi Retail™ provides accurate and usable information instantly and securely to all levels of your organization.

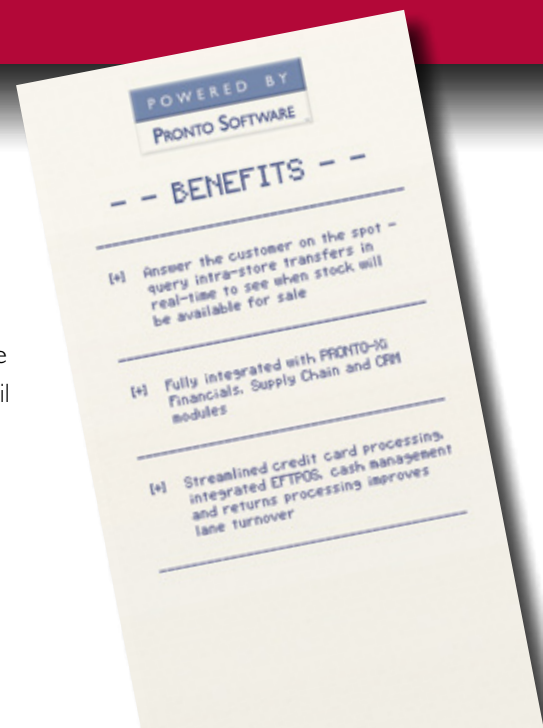

“PRONTO-Xi has given us the ability to *optimize* stock levels, *capitalize* on top sellers and *increase* our stock turns.”

Greg Heath, Chief Executive, Total Tools

Total Tools

Simplicity and ease of use are hallmarks of the PRONTO-Xi Retail solution, ensuring minimum impact on your business during set-up and staff training. Customizable touch screen menus enhance lane speed. Staff can quickly compare items being scanned with on-screen images which reduces shrinkage. From managing the customer service experience to conducting highly efficient stocktakes using the latest RF technology, PRONTO-Xi Retail ensures your staff are doing less administration and more selling.

...so easy to work with™

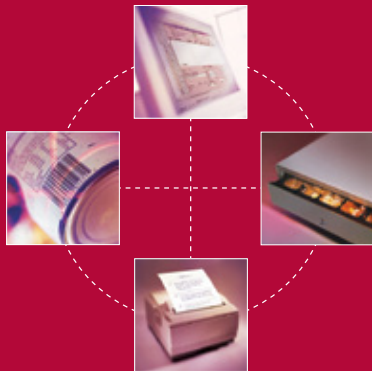

Simplicity, Security, Reliability

In today's retail environment, security is a key issue. To meet this need, PRONTO-Xi Retail supports sophisticated role based security policies. Operational information, such as cost of goods, can be enabled for store managers, but hidden from other staff.

Besides the rich functionality that drives PRONTO-Xi Retail, you can rest assured that your business critical system will keep performing day-in, day-out. PRONTO-Xi's development platform is rock solid and tested in the field, to ensure your stores can trade confidently during the busiest periods. PRONTO-Xi's Easy POS™ screens automatically scale to match your POS hardware, an industry-leading innovation that streamlines your hardware upgrade path. Easy POS includes per-lane configurable workflow and is touch-screen aware to dramatically reduce staff training. You can even add your own business specific help text to ensure staff can quickly find the answers they need. PRONTO-Xi's unmatched flexibility and performance means you can run the same system for multiple brands and customer touch points.

Accelerated ROI

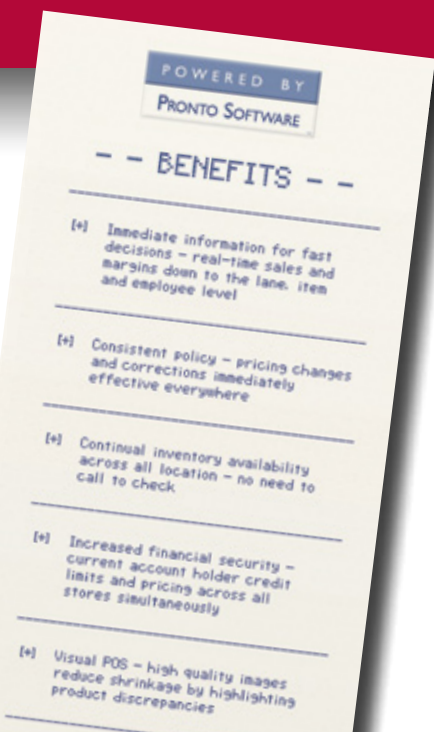

PRONTO-Xi Retail creates a cost-effective environment where the sales process is simpler, more secure and extremely productive. Innovative POS technology coupled with a powerful and comprehensive back-end will see your retail solution growing with your business.

From lane turnover and other key performance indicators to inventory, credit limit, promotion and pricing data, PRONTO-Xi enhances your customers' experience and delivers an accelerated return on investment.

Real-time Integration

At the storefront, PRONTO-Xi Retail is designed to allow your staff to focus on the customer rather than the mechanics of the transaction. With just a screen touch or a keystroke, sales staff can process cash transactions or determine product availability from inter-store, intra-store and warehouse inventory levels in real-time.

At your headquarters, authorized personnel have an instant view of sales and inventory in real-time across multiple locations. Where pricing changes, corrections or promotional offers are implemented, they are effective immediately across all stores and levels of your organization. Complicated, error prone batch communications become a thing of the past.

As a leader in the enterprise software services industry, PSA Inc., is known for its dedication, professionalism and its comprehensive business knowledge. PSA specializes in providing value added business solutions that are aligned with its clients' goals and expectations.
