

Keeping your IT infrastructure simple

In today's highly competitive environment, your company needs an edge. It has become increasingly important to focus on your business goals and strategies to stay on top of market fluctuations and respond quickly when conditions change.

Software as a Service (SaaS) – or on-demand software – gives you the option to outsource the maintenance and maximise the effectiveness of your technology investment.

Whether it's your PRONTO-Xi ERP system, your corporate website or another application, a SaaS solution from Pronto Hosted Services (PHS), a division of Pronto Software, takes care of your IT infrastructure while you concentrate on your core business.

When you partner with PHS, you benefit from the reliability and consistency that come from dealing with a single organisation. You also engage an Australian company that has delivered first-class, affordable SaaS solutions since 2002.

SaaS your way

PHS offers fully customised, flexible solutions. With years of experience proposing SaaS solutions, we know that there is no "one size fits all" solution for your IT needs.

Whether you want to rent your business software for a low monthly fee, outsource your IT infrastructure or get our Pronto experts to manage, monitor and maintain your systems, PHS has the solution for you.

Scaling new heights

Adventure retailer Kathmandu estimated it saved more than \$250,000 by deploying a SaaS solution. With Pronto Hosted Services managing the company's IT infrastructure, Kathmandu no longer had to worry about accommodating its server, upgrading the hardware and software or investing in employing and training support staff.

"It made sense to leave it to the experts," says Bryan Moore, General Manager of Information Technology for Kathmandu. "We could keep costs down, ensure we had a stable, low-risk environment and not have to worry about downtime or maintenance issues."

We deliver the hardware, software and a range of management services that help your business to grow, adapt to changes in the market and stay ahead of the competition.

A solution from PHS gives you:

- ◆ Flexible, subscription-based pricing
- ◆ Around-the-clock monitoring
- ◆ Superior technical and help desk support from our experienced customer service team
- ◆ Service level agreements that ensure everything we do is of the highest quality
- ◆ Real-time redundancy in distributed data centres and data backup management.

Secure and transparent SaaS

Our SaaS options offer an unmatched level of security and transparency for your mission critical data.

Australian compliance

Unlike many SaaS vendors that send data all over the world, your data will be stored in an Australian data centre and managed by local Australian staff. This means we fully comply with the Australian privacy laws and regulations, and with local laws that govern agreements between PHS and its customers.

Secured data

PHS manages your data with the highest level of security and encryption. In addition, we are not bound by foreign laws such as the United States' Patriot Act, which requires companies in the US to hand over data when a US government agency requests it.

Data access and ownership

Your data is stored as if it were on a server in your office. This lets you retain full ownership of and access to your data in a standard format should you change your IT infrastructure.

Empowering your business

By managing your IT infrastructure and applications, PHS gives you every opportunity to successfully run and grow your business.

With our flexible, affordable and application-rich enterprise products, we can help you make the most of your business processes, analyse relevant data in real time and achieve your targets and goals.

Better for business

We provide an end-to-end integrated solution that ensures all aspects of your business – from financials and manufacturing to customer relationship and warehouse management – are optimised.

Through PHS's enterprise solutions, we provide the organisational and strategic tools your employees need to work efficiently and productively. We provide managers with reliable, up-to-the-minute business intelligence for quick decision making.

PHS offers enormous flexibility to adapt or scale system software. We can update your system architecture if newer technologies are introduced. We can also reconfigure the system when your company grows, changes direction or needs to take advantage of new opportunities.

Easier, simpler all round

PHS manages the IT systems of many large companies. We have the skills and economies of scale to implement software applications more effectively and cost-efficiently. By using our on-demand service, you have no minimal start-up time and no requirement for lengthy procurement or technical training.

We customise your solution so it perfectly fits your business needs. In this way, the system is designed to facilitate the way your company operates to ensure your employees have the right tools for the job.

By having a simplified, easy-to-use IT set up, PHS helps you save on overheads. We cut the costs of administration, support, maintenance, upgrade and deployment – all without compromising functionality and the return on investment.

WHY CHOOSE PHS?

- ◆ **Unrivalled functionality, customisation**
PHS offers enterprise solutions that are rich in features and functions. Our highly skilled consultants will work closely with you to develop a tailored solution that best meets your company's needs.
- ◆ **Enhanced performance, reliability**
By managing your IT systems off or on-premises, PHS provides improved guarantees of uptime, service availability and delivery – allowing you to focus more on your business and less on your IT.
- ◆ **Greater security**
With any hosted solution, security is critical. You need to know your data is safe. PHS offers the highest level of security for your data, workflows, forms and audit trails.
- ◆ **Lower investment and running costs**
By choosing on-demand software, you don't need to invest as much as you would if you owned the hardware and software outright, or had to employ staff to manage your IT infrastructure. As a subscription-based service, you only pay for what you need and use.

Pronto Hosted Services

ERP On-demand since 2002

For more than 30 years, Pronto Software has been synonymous with providing the very best in ERP software with our flagship product PRONTO-Xi. By delivering PRONTO-Xi via the SaaS model, Pronto delivers flexible and affordable business outcomes customised specially for you.

PRONTO-Xi empowers your workforce with a wide range of business applications. Delivering an overall view of all key business areas, your managers and sales force can see what is happening across the organisation – from financial, sales and retail data to customer relationship, warehouse and supply chain management.

More importantly, they can access information they need to act decisively and quickly. Many processes are automated, resulting in improved employee communication, collaboration and productivity.

Through greater visibility and transparency, your company can take complete control of the business, quickly adapting processes and software to meet changing needs. By being more agile and responsive, you can operate more efficiently and improve customer service.

PRONTO-Xi provides you with a seamless flow of information by making sure all transactions are fully accounted for within your business. This saves time and money while boosting profits and long-term business value.
